## CLASS CONTENT

---

### STRATEGIES

- Write it down. Cross it off.
- Watch out for the crazy talk.
- You don't have to know where you're going.
- Use the answers.
- Trickery.
- Timing.
- Answer every multiple choice question.
- It goes away without practice.

### MATH LESSONS

- Get to the Grid-In.
- Problem order.
- Answer order.
- $y = mx + b$  and word problems
- Systems of Equations and word problems

### READING LESSONS

- Read the intro. Skip the passage.
- Question order: detailed to general.
- Evidence-based.
- Chronological order.

### WRITING & LIT LESSONS

- You be the judge.
- What is changing in the answers?

---

Come to class with pencils and a calculator. All worksheets are supplied. Pre- registration is required.

## SAMPLE LESSON

After the  $y = mx + b$  lesson, you will be able to answer these questions in a few seconds without doing any math.

$$y = 2.5x + 40$$

The equation above models the total cost  $y$ , in dollars, that a company charges a customer to rent a car for one day and to drive the car for  $x$  miles. The total cost consists of a flat fee plus a charge per mile driven. When the equation is graphed in the  $xy$ -plane, what does the  $y$ -intercept of the graph represent in terms of the model?

- A) A charge per mile of \$2.50
- B) A flat fee of \$40
- C) A charge per mile of \$40
- D) A total daily charge of \$42.50

.....

At Dwight's gym, there is a \$100 startup fee and a \$32 monthly fee. What equation below models the cost of the gym?

- A)  $c + 100 = 32m$
- B)  $c = 132m$
- C)  $c = 12m + 100$
- D)  $c = 32m + 100$

.....

A new company opened with 7 employees. The owners will hire 3 new employees every quarter (every 3 months). What is the equation of the line that represents the number of employees,  $y$ , employed  $x$  quarters after the company opens?

- A)  $y = 7x + 3$
- B)  $y = 7x + 4$
- C)  $y = 3x + 7$
- D)  $y = 4x + 7$
